In consequence of an unusually liberal appropriation for binding I have been enabled to place the library in a much better condition than it has been for the last twenty years. Six hundred and ninety-one volumes, embracing all those in the special departments of the library fit for and needing binding, together with some of the American journals, have been placed in proper condition on the shelves. The work has not, however, included all the unbound books in the portions of the library alluded to, complete volumes in paper covers, especially if seldom consulted, having been allowed to remain as they are, in the hope that future appropriations may provide for them. More than twice as many volumes in the other sections of the department of journals and periodicals remain unbound. It is hoped, therefore, that a like liberal provision may be made for the continuation and completion of the work during the coming year.

While the library is more fortunate than any other department of the Academy in having the income of the I. V. Williamson and the Thomas B. Wilson Funds devoted exclusively to its increase, it will be seen by the report of the treasurer that the amount thus appropriated is not sufficient to meet the constantly increasing demands on the Library Committee. While little more than the subscriptions

to indispensable journals and the purchase of books absolutely needed by our students has been provided for during the past year, yet with the exercise of the strictest economy the amount derived from the library funds has been overdrawn. It is, therefore, evident that a liberal increase in the pecuniary resources of the library is needed if we are to maintain in the future our merited reputation of having the best collection of scientific works in America. Three times the amount now at our disposal could readily be spent annually without involving the slightest waste or extravagance.

All the portraits of presidents and benefactors have been carefully examined by a reliable expert since my last report. They have been cleaned, varnished and, when necessary, as was the case in several instances, rebacked with canvas. The appearance of this interesting collection of paintings has thus been much improved.

We are indebted to Mrs. Ellen M. Carpenter for a good portrait in oil of Mr. Geo. W. Carpenter by whom the Academy was served most efficiently as Treasurer for thirty-four consecutive years.

An interesting oil portrait of Mr. Augustus E. Jessup, the beneficent founder of the Academy's Jessup Fund, has been received from his daughter Mrs. Bloomfield H. Moore, to whose intelligent liberality the Academy is also deeply indebted. The painting represents Mr. Jessup in early manhood and therefore differs widely from the one given to the Academy by his children several years ago. The recent gift formerly belonged to Peale's museum and is now hung in the Librarian's room.

I have received efficient assistance in the current work of the library from Mr. William J. Fox and also, during a portion of the year, from Signor E. Fronani, the greater part of whose time, however, as will be seen by the report of the Recording Secretary, was devoted to the work of another department.

All of which is respectfully submitted.

EDW. J. NOLAN,
Librarian.

REPORT OF THE CURATORS.

It has been the endeavor of the Curators throughout the year to pay particular attention to the examination and renovation of the more perishable collections and to the replacement in the museum of such
